

THE A.C.T. CASTING METHOD

Simple Reproducible Accurate

The A.C.T. casting process for foot orthotics insures great outcomes with minimal returns. Two minutes per foot is all it takes to heat the cores and make perfect impressions every time. This is the real alternative to messy plaster and inconsistent foam impressions. Easy to make, easy to mail, easy to understand.

The A.C.T. Nylon Shell Orthotics

- Nylon blended functional shells are injection molded and heat formed to the unique patient model
- Three flexes are available to insure proper foot control and compliance
- Unlimited lifetime guarantee against shell breakage
- Heat adjustable in the office
- Multiple top covers and accommodations available at no extra charge

48 hour turnaround
